## Overview

Endometrial cancer of the uterus, sometimes referred to as uterine cancer, is the most common cancer of the reproductive system. It develops in the uterus, though most endometrial cancers develop in the endometrial glands that line the inner wall of the uterine cavity, rather than in the uterus' muscular wall. Learn more information about signs, symptoms, diagnosis, treatment, and resources at the link provided. Website: https://www.ucsfhealth.org/conditions/endometrial-cancer

## UCSF Resources

UCSF Gynecologic Oncology Center

The UCSF Gynecologic Oncology Center offers innovative, compassionate care in a supportive environment. Our team – which includes gynecologic cancer surgeons, radiation specialists and specially trained nurses – provides screening exams, diagnostic imaging and treatments such as surgery and radiation. We also offer expert advice on the latest therapies, as well as education and other services. Genetic counseling for high-risk families is also available. We have three locations in the Bay Area to make patient visits as convenient as possible. Website: https://www.ucsfhealth.org/clinics/gynecologic-oncology-center | Phone Number: (415) 353-9600
